Important information

- To avoid incurring the Service Charge, ensure that your account meets the Minimum Average Daily Balance.
- Your Average Daily Balance is the total amount of your account balances at the end of each day, divided by the number of days in the month.

Example

Let’s take the month of June as an example, which has 30 days.

- **First 15 days:** Your account had **\$100 every day**
→ $\$100 \times 15 \text{ days} = \text{\textit{\$1,500}}$
- **Next 15 days:** Your account had **\$400 every day**
→ $\$400 \times 15 \text{ days} = \text{\textit{\$6,000}}$
- **Total of daily balances:** $\$1,500 + \$6,000 = \text{\textit{\$7,500}}$
- **Average Daily Balance:** $\$7,500 \div 30 \text{ days} = \text{\textit{\$250}}$

Refer to the table below to find the minimum average daily balance required for your specific account type.
